Get Started

Hello world

Install the **xaringan** package from **Github**:

```
devtools::install_github("yihui/xaringan")
```

You are recommended to use the **RStudio IDE**, but you do not have to.

- Create a new R Markdown document from the menu File -> New File -> R Markdown -> From Template -> Ninja Presentation;¹

[1] 户请 这份教 [2] See #2 if you do not see the template or addin in RStudio.

xaringan

xaringan 너무 좋아요!

who is this?

Tidyverse Korea

Thanks!

Slides created via the R package **xaringan**.

The chakra comes from **remark.js**, **knitr**, and **R Markdown**.
