Get Started

Hello World

Install the xaringan package from Github:

```
devtools::install_github("yihui/xaringan")
```

You are recommended to use the RStudio IDE, but you do not have to.

- Create a new R Markdown document from the menu `File -> New File -> R Markdown -> From Template -> Ninja Presentation`;[1]

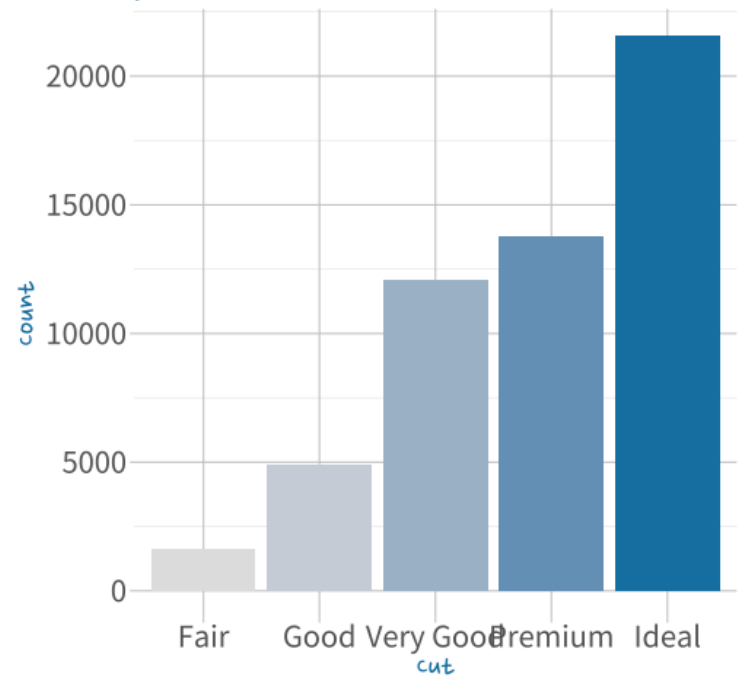

[1] 中文用户请看这份教程 [2] See #2 if you do not see the template or addin in RStudio.

Tidyverse Korea

```r
library(ggplot2)
ggplot(diamonds) +
  aes(cut, fill = cut) +
  geom_bar(show.legend = FALSE) +
  labs(
    x = "Cut",
    y = "Count",
    title = "A Fancy diamonds Plot
  ) +
  theme_xaringan(background_color
  scale_xaringan_fill_discrete()
```

A Fancy diamonds Plot

Thanks!

Slides created via the R package xaringan.

The chakra comes from remark.js, knitr, and R Markdown.
